I would like to voice my opinion regarding satellite radio broadcasting traffic and weather.

In the 6 months since I have subscribed to XM Satellite Radio, it has made my 42-mile ride to work a pleasure. There are so many choices that I actually look forward to the ride. Even in traffic, I find myself calmer and take that opportunity to listen to the comedy stations. Since I am paying for this service, I expect to be able to listen to traffic & weather on XM, along with all the other information and music they provide. Accordingly, I would hope that reason will prevail and this information will continue to be allowed on satellite radio.

Sincerely,

Janet Walker  
(an avid satellite radio listener)
